I'm a highly driven full-stack developer specializing in the MERN stack, passionate about building scalable, user-centric applications. With expertise in frontend and backend technologies, I create innovative solutions that enhance efficiency and user experience. Seeking a challenging frontend role to apply my creativity and technical expertise to impactful projects.

Work Experience

Software Developer Engineer (SDE-1)   September 2024 – Present
Aapmor Technologies

- Contributed to the **Identity Governance and Administration (IGA)** project, developing secure access solutions for platforms like **SAP, Azure, and Jira** using the **MERN stack** .
- Engineered **role-based access control (RBAC)** and **privileged access management (PAM)** features to streamline user authentication and authorization.
- Developed and optimized **real-time data streaming** and **event-driven architectures**, ensuring seamless identity synchronization across multiple platforms.
- Collaborated with **enterprise clients** to design scalable identity solutions tailored to their security and compliance needs.

- Integrated **audit logging and compliance tracking** to enhance security posture and regulatory adherence.

Full Stack Developer Intern   March 2024 – August 2024
Aapmor Technologies

- Developed **event scheduling and real-time updates** using **Next.js and MongoDB**, improving **UI performance and backend efficiency**.
- Led **MERN stack** development to enhance HR functions such as **employee onboarding, attendance tracking, and performance reviews**, improving **HR operational efficiency**.
- Built **custom APIs** for seamless data exchange between microservices, reducing load time and improving **system responsiveness**.
- Worked closely with **client teams** to gather requirements, implement feedback, and deploy solutions that **optimized workforce management**.
- Designed and implemented a **dashboard with analytics** for real-time monitoring of HR metrics, increasing **data visibility** for HR managers.

Skills Summary

- **Programming Languages:**   C, Java, SQL, JavaScript
- **Frameworks:**   React.js, Express.js, Node.js, Next.js
- **Database**   MongoDB
- **Tools:**   Alteryx (Data Analysis), Excel, GitHub
- **Soft Skills:**   Problem-solving abilities, Critical thinking, Creativity, Communication

Education

Geetanjali College of Engineering and Technology   **June 2019 – June 2023**
B-Tech Mechanical Engineering, CGPA: 8.3

Sri Chaitanya Junior college   **June 2017 – March 2019**
Senior Secondary Education – MPC, CGPA: 8.3

D A V Public School   **March 2017**
Secondary Education – CBSE, CGPA: 7.0

Projects

Naukri Webpage Clone   **Feb 2024 – Mar 2024**

o   Created a Naukri frontend clone using React.js, JavaScript, and CSS.

o   Implemented job listing, search functionalities, and user profiles to simulate Naukri's platform.
